C4E Environmental and Sustainability Education Symposium

Thursday, March 31, 2016
10:00am to 4:00pm
Dauch Alumni Center, Prusecki Room.

The Center for the Environment has organized a faculty group to explore ideas for creating a university-wide undergraduate certificate in environmental and sustainability studies. As part of that process and with funding from the College of Liberal Arts, the center will host three experts from similar programs at other universities as part of an interactive symposium on March 31. Speakers will describe their lessons about creating successful undergraduate env/sustainability programs in the morning, and participants will split into breakout groups in the afternoon to discuss different aspects of a possible Purdue certificate program. Lunch will be provided. **Space is limited, so register early!**

**Featured Speakers**

**Dr. Susan E. Powers** is the Spence Professor of Sustainable Environmental Systems and the Associate Director of Sustainability in the Institute for a Sustainable Environment at Clarkson University. In her current position, Dr. Powers promotes project-based learning experiences to promote sustainability for college students.

**Dr. Jeffrey White** is Professor of Environmental Science in the School of Public and Environmental Affairs and of Geological Sciences in the College of Arts and Sciences at Indiana University, Bloomington, where he has served for 33 years. White is Director of IU’s Integrated Program in the Environment – a campus-wide program bringing educational and research activities in environmental sciences and sustainability studies under a single umbrella organization that integrates across the entire academic community.

**Dr. Candice Carr Kelman** is the Assistant Director of the School of Sustainability (SOS) at Arizona State University, and a Senior Sustainability Scholar with the Julie Ann Wrigley Global Institute of Sustainability at ASU. She oversees curricular planning, the implementation of SOS degree programs and graduate fellowship programs, faculty teaching plans and processes, the student services office, and student recruitment. Dr. Carr Kelman studies policy and governance dimensions of sustainability issues, particularly those related to the conservation and restoration of forests
